

Anyhow, after a long river cruise through the whole country our plastic bag reaches the big wide ocean.

In the ocean it is a dangerous object. Fish, dolphins or turtles get caught in the plastic waste. For our plastic bag, however, the journey continues on the sea currents.

After a long journey our plastic bag reaches the home of many plastic waste. It comes to "Plastic Island", where it will stay with a lot of other plastic waste for a very long time.

The journey of the majestic plastic bag

Your name:

And if he was not disposed yet, it still floats there today.

Here in the River ends the journey of many plastic bags. They get stuck on the shore or on wood.

The wind blows the plastic bag into a river. There it swims on the water through the country.

Through the force of the wind it gets blown away through streets, buildings and parks. It flies out of the city.

Like many other plastic bags, the journey of our plastic bag begins in the supermarket. It gets thrown away by human being.
